Book

Delete Column Update

A dictionary entry manages how ServiceNow stores data in tables and fields (columns). For new dictionary entries, select a **Table** and the field **Type** of the new column. Also enter a column label, which becomes the field label, and the column name. If necessary, set a **Max length** for text String type fields, make the field **Mandatory** to save a record, and make the field a Display Value for reference fields so it appears on records that reference this table. More Info

* Table	Borrow Request [u_borrow_...	Application	Global
* Type	Reference	Active	☑
* Column label	Book	Function field	☐
* Column name	u_book	Read only	☐
		Mandatory	☐
		Display	☐

Reference Specification | Choice List Specification | Default Value

The **Reference** field specifies what table this field displays values from.

* Reference: Book

Reference qual condition: Add Filter Condition | Add OR Clause

Status | is | Available | AN

All Favorites History Admin UI Policy - New Re...

UI Policy
New record View: Advanced*

Submit

UI policies change fields on a form based on a set of conditions. Use UI policies to show or hide fields, or to make fields mandatory or read-only based on these conditions. A UI policy specifies one or more actions to take when the policy is triggered. First, create the policy. Then add as many actions as necessary. UI policy actions are applied only if all of the following conditions are met:

- The UI Policy is **Active**
- The items in the **Conditions** field evaluate to true
- The field specified in the UI policy action is present on the specified form

More info

Table: Borrow Request [u_borrow_...

Application: Global

Active: ☑

* Short description: Make Return Date mandatory when Issued.

Order: 100

When to Apply | Script

Conditions: Add Filter Condition | Add OR Clause

-- choose field -- | -- oper -- | -- value --

If selected, the UI Policy applies to all form views; otherwise the UI Policy is view-specific

Global ☑

Apply the UI policy actions when the form is loaded and when the user changes values on the form

On load ☑

Reverse the effects of the UI policy actions when the **Conditions** evaluate to false

Reverse if false ☑

Tables that extend the specified **Table** inherit this UI Policy

Inherit ☐

Submit
